What is coinsurance?

Coinsurance is a portion or part of the total cost, typically as a percentage. With this plan, you pay part of the cost of Tier 3, Tier 4 and Tier 5 drugs. For example, if your coinsurance is 25% and the total cost of your prescription is $100, you would pay $25. The plan pays the rest. You pay the full cost of your drugs until you meet the deductible, then you'll start paying the coinsurance amount.

Prescription drug payment stages			
Deductible	There is no deductible for drugs in Tier 1 and 2. Your coverage for these drugs starts in the Initial Coverage stage. There is a $700 deductible for drugs in Tier 3, 4 and 5. You pay the full cost for your drugs in these tiers until you reach the deductible amount. Then you move to the Initial Coverage stage.		
Initial Coverage	In this stage, you'll pay your plan copays or coinsurance. The plan pays the rest. Once you, and others on your behalf, have paid a combined total of $2,400, which includes the amount you paid towards your deductible, you move to the Catastrophic Coverage stage.		
Tier drug coverage	**Retail**		**Mail Order**
	30-day supply^	**100-day supply**	**100-day supply**

^Members living in long-term care facilities pay the same for a 31-day supply as a 30-day supply at a retail pharmacy.

[4]You pay no more than 25% of the total drug cost or a $35 copay, whichever is lower, for each 1-month supply of Part D covered insulin drugs, even if you haven't paid your deductible, until you reach the Catastrophic Coverage stage where you pay $0.
